## **DETAILED ACTION**

Claims 34-76 are pending in the application.

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Due to the numerous variables in the claims, e.g.  $X^1$ ,  $X^2$ ,  $Y^1$ ,  $Y^2$ ,  $R^A$ , W,  $Z^1$ ,  $Z^2$ ,  $A^1$ ,  $A^2$ , Q, V, m, etc., and their widely divergent meanings, a precise listing of inventive groups cannot be made. The following groups are exemplary:

Application/Control Number: 10/048,008

Art Unit: 1626

**Group I.** Claims 34-55, 68 and 69 (in-part), drawn to methods of using products of formula (I) wherein  $X^1$  is a thiazole ring,  $Y^1$  is  $NR^ACO$ - $(CH_2)_{0.2}$ -,  $Z^1$  is a phenylene and  $A^1$  is a thiazolidine ring.

**Group II.** Claims 34-55, 68 and 69 (in-part), drawn to methods of using products of formula (I) wherein  $X^1$  is a thiazole ring,  $Y^1$  is  $NR^GCO$ - $(CH_2)_{0-2}$ -,  $Z^1$  is a phenylene and  $A^1$  is a oxazolidine ring.

Group III. Claims 56-67 and 70-76 (in-part), drawn to products wherein  $X^2$  is a thiazole ring,  $Y^2$  is  $NR^GCO$ - $(CH_2)_{0-2}$ -,  $Z^2$  is a phenylene and  $A^2$  is a thiazolidine ring.

**Group IV.** Claims 56-67 and 70-76 (in-part), drawn to products wherein  $X^2$  is a thiazole ring,  $Y^2$  is  $NR^GCO$ - $(CH_2)_{0-2}$ -,  $Z^2$  is a phenylene and  $A^2$  is a oxazolidine ring.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Application/Control Number: 10/048,008

Art Unit: 1626

Again, this list is not exhausted as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and the examiner will endeavor to group the same.

The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a carbon {see formula (I)} which does not define a contribution over the prior art. The substituents on the carbon vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

Art Unit: 1626

Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.
